## Congratulations on your purchase

Doro 8030 is a revolutionary smartphone that does what other smartphones do, but far more easily than ever before. Now you can communicate and enjoy photos, videos, fast 4G Internet and much more in a way that simplifies how you set up, access and use the phone's various functions. Get help as you go from the built-in coach, and feel even more secure with safety features such as our Assistance button. You can also add more apps via Google Play, and easily manage settings and content remotely. If using a smartphone seems unnecessarily complicated, Doro 8030 will change your mind. It's the first smartphone to think the way you do, making it the perfect choice for first-time users who want all the enjoyment a smartphone can offer, but in an easier, more intuitive way. For more information about accessories or other Doro products please visit [www.doro.com](http://www.doro.com).

## How to set up your Doro 8030

When you first get your phone, there is a few actions that you need to take before starting to use it.

### Step 1 — Unbox your new phone

The first step is to unbox the phone and assess the items and equipment included in the delivery. Make sure to read through the manual so you can familiarize yourself with the equipment and the basic functions.

- The items supplied with the device and any available accessories may vary depending on the region or service provider.
- The supplied items are designed only for this device and may not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from your local Doro retailer. Make sure they are compatible with the device before purchase.
- Only use batteries, chargers and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone's type approval and warranty.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Doro website.

## Step 2— Insert memory card, SIM card and battery

### IMPORTANT!

Turn off the phone and disconnect the charger before removing the battery cover.

### Remove the battery cover

#### IMPORTANT!

Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may get damaged.

### Insert the SIM card

#### CAUTION

This device accepts micro SIM or 3FF SIM card. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

## Insert the memory card

### IMPORTANT!

Use only compatible memory cards with this device. Compatible card type:

**microSD, microSDHC.**

Incompatible cards may damage the card itself, the device and corrupt any data stored on the card. Some phones may have a pre-installed memory card.

**Tip:** Take care not to scratch or bend the contacts on the memory or SIM card when inserting them into the card holders.

See *External memory*, p.39 for additional info.

## Insert the battery

## Step 3— Charge

Charge your phone. While it's possible that your phone will already come with enough charge to be powered on right out of the box, we recommended to give it a full charge before first using it.

### CAUTION

Only use batteries, chargers and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone's type approval and warranty.

- Insert the small end  of the included USB cable into the Micro USB port on the phone (A).
- You can also charge the phone using the cradle. Insert the small end  of the included USB cable into the Micro USB port on the cradle and place the phone in the cradle (B).
- Insert the other end  of the included USB cable into the wall charger that you plug into to a wall socket.
- You can also plug the included USB cable  into a USB port on your computer. Generally charging is quicker if plugged directly into the wall.

If the phone is turned off during charging, the phone is still charging. Press the  **Power button** to view charging status.

### Save energy

When you have fully charged the battery and disconnected the charger from the device, unplug the charger from the wall socket.

**Note!** To save power, the screen is locked after a while. Press the  **Power button** to activate the screen, see *Lock screen*, p.10

## Step 4— Turn on the phone

**Note!** When turning on your phone, the installed applications may need to be updated. Application updates requires Internet connection and can take a few minutes. A Wi-Fi connection is preferable. The phone may appear a bit slow during the update.

- Once you've fully charged the device, turn it on by pressing and holding the  **Power button**. Keep it pressed until the phone vibrates and the display lights up.
- Enter your SIM card PIN if requested, then select  to confirm. Tap  to erase.
- Wait for the phone to start.

If the wrong PIN code is entered several times **Enter PUK** is displayed and you need to enter your PUK code (Personal Unblocking Key). Contact your service provider for more information about PIN and PUK code. See *Change the SIM PIN code*, p.41 for information about changing the PIN code.

### To turn off the phone

- Press and hold the  **Power button** until the options menu opens.
- In the options menu, tap **Power off**.

## Get to know your phone

### Sign in to Google™

#### IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

You need to have a Google™ account, one free account gets you into everything Google. It's a convenient way to manage your phone's applications, contacts, calendar events, reminders and more. You can also back up your information in case you should lose your phone. You don't have to use any of the specific Google services like Gmail on a daily basis if you don't want to, and you can add other email accounts to your phone.

#### Create Google™ account

1. From the Home screen, select  **Play Store**.
2. Follow the on-screen instructions to complete the account setup.

### Assistive functions

Use the symbols to guide you through supporting sections in the manual.

Seeing

Handling

Hearing

Safety

### Conversational questionnaire

Learn at your own pace! Setting up your phone the first time can be tricky – we created the conversational questionnaire to help you to easily navigate and explore your device – asking all the right questions so that your phone is as unique as you. Follow the instructions to start personalising your new Doro 8030.

### Touchscreen motion and gestures

Here is a description of how to use your touchscreen and gestures (motions that you make with one or two fingers).

**CAUTION**

Avoid scratching the touch screen, do not tap it with anything sharp or allow the touch screen to come into contact with water. Do not touch the screen if the glass is cracked or shattered.

**Touch or tap**

- Touch or tap an item, such as a button or a program icon, to select it or to open it. Touch can be used to select or deselect a relevant tick box in a list of options.

**Double-tap**

- Touch the same item twice to zoom in on a map or an image.

**Long press**

- Touch and hold an item on the screen. Some actions, such as to move an icon on the Home screen, begins with a long press.

**Select or deselect options**

- Select or deselect (tap) relevant boxes or list options.

**Drag and drop**

- Dragging and dropping is a way of moving something — for example, an app on your desktop — from one place to another. To drag, put your finger on an app and hold down. As you move your finger across your screen, the app is dragged across the screen, or across several screens. Place your finger where you want the app to go and release your finger. The app drops. While dragging and dropping a helpful little menu, **Drag and drop**, is shown to confirm that you are doing it right.

---

## Scroll, Swipe and Flick

- A swipe is when you press your finger to the screen and drag to the right or left, the screen moves. Swiping to the left on the Home screen, for example, moves you to the next Home screen. Drag or flick your finger on the screen in the direction you want to go. Think of it as using the left- or right-arrow keys on a computer keyboard.
- **Flick** means to swipe more quickly on a page, quickly flick your finger on the screen in the direction you want to move.

## Pinch and spread (zoom)

- To pinch: Place two fingers separated on the screen and pinch them together to zoom out of a map. This function is not always applicable.
- To spread: Place two fingers together on the screen and spread them to zoom in. This function is not always applicable.
- If available, tap  to zoom in or  to zoom out.

## Sensors

Your device has sensors that detect light and proximity.

- **Light sensor** to detect light and adjust the brightness of the screen, if set to automatic. See *The screen brightness*, p.30.
- **Proximity sensor (touch sensor)** to detect motions. It can turn the touch screen off during voice calls when your ear is close to the screen to prevent unintentionally activating other functions. See *Call settings*, p.45

## Home screen

The Home screen is your start screen on your Doro 8030, and here you can collect the apps and your favourite contacts that you use most often. You can also set your favourite picture as wallpaper. Use the Google™ search bar to quickly find what you are looking for. To add a shortcut to the Home screen see *Add a shortcut*, p.29 and to remove shortcuts see *Remove a shortcut*, p.29.

### Go to the Home screen

- Press .

### Access the extended Home screen

1. Tap the arrow  at the bottom end of the Home screen.
2. To close the extended screen, tap the arrow  again.

**Tip:** You can also swipe upwards or downwards to open and close the extended Home screen.

## Lock screen

The screen turns off and locks when you are not using the phone. The lock screen can show time and date as well as notifications like missed calls or messages.

---

**Note!** Your phone continues to run while it's sleeping. Mail is received, social networking updates are made, and so on. Your phone also continues to play music while the screen is locked.

### Activate or unlock the screen

- Briefly press the .

### Lock the screen

- Briefly press the  **Power button**.

## Screen lock

The screen lock prevents unwanted actions on the touch screen when you are not using the phone.

### Screen lock settings

You can change the way that you lock the screen to prevent others from accessing your personal information.

1. To activate the screen lock or change the type of screen lock, tap  **Set**.
2. Tap **A general option** →  **My screen lock**. Tap to select one of the following:
  - **None** to unlock, press  or the  **Power button**. **No security**.
  - **Swipe** (default setting) to unlock you slide  up with your finger. **No security**.
  - **Pattern** to unlock you trace a pattern with your finger on the screen. **Medium security**.

**Note!** You can trace over the dots in any order, but you can trace over the same dot only once. The pattern must cover at least four dots.
  - **PIN** to unlock you type a PIN. A PIN consists of numbers only. Enter at least four numbers, and then enter the password again to verify it. **Medium to high security**.
  - **Password** to unlock you type a password. A password can consists of characters and/or numbers. Enter at least four characters including numbers and symbols, and then enter the

password again to verify it. **High security.** Password must contain at least one letter.

### IMPORTANT!

It makes sense to choose a PIN code or a pattern that is easy to remember, but try to make it difficult enough so that others can't guess it. If you activate it, keep the code/pattern in a safe place, since it will be needed if you need to reset.

**Note!** The available options may vary depending on the screen lock method selected.

## To use the phone keys

### Recents key

- Press  to view recently used applications.
  1. To close an application, swipe it to the left or right. Or tap the  to close all at once.
  2. To open an application, tap it.

### Home key

- Press  to return to the Home screen.
- Press and hold  to launch **Google Now**. Google Now is an intelligent personal assistant developed by Google, that is available within the Google search mobile application.

### IMPORTANT!

You need an Internet connection and a Google account (see, *Sign in to Google™*, p.7) to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

To set up Wi-Fi, see *Connect to Internet using wireless networks (Wi-Fi)*, p.19.

### Back key

- Press to return to the previous screen, or to close a dialog box, menu, or keyboard. Once you are back to the Home screen, you can't go back any further.

## Side volume keys

- During a call the volume keys adjust the call volume.
- From standby the volume keys adjust the ringtone volume.
- To adjust the volume level for music and videos.

## Soft keys

Android smart phones like your Doro 8030, as well as most Android applications, feature common icons. Many icons that you see on-screen are actually buttons on the touchscreen. If you don't see the text, images or information that you want, try to touch the screen or to tap an icon for a pick list or to reach another menu.

## To access further options

 more options (available in the action bar or in apps).

**I want to** more options (available in the action bar or in apps).

## To enable and disable features and functions

 or  enabled functions.

 or  disabled functions.

## My applications screen

Application is another word for program or software, a common way to shorten the term application is App. The application screen contains the applications that come pre-installed on your Doro 8030 and any other apps that you choose to install. The applications screen extends beyond the regular screen width, so you need to swipe left or right to view all content. The number tabs at the bottom displays the current screen of the applications, you can also tap a number tab to select that screen.

## Open the application screen

- From the Home screen, tap the shortcut  **My apps**.
- Or from the Home screen, **swipe** to the right to open  **My apps**.

## Close the application screen

- Press  or .

---

To install applications, see *Doro Selection*, p.52.

## Application screen settings

1. From the Home screen, tap the shortcut  **My apps**.
2. Or from the Home screen, **swipe** to the right to open  **My apps**.
3. Tap **I want to**.
4. Tap **Open settings**:
  - **Drag and drop** switch on  to enable drag and drop on long press. This allows you to touch and hold applications on-screen, slide your finger to the item's new location, lift your finger to drop it in its new place.
  - **Application sorting** to arrange your applications by download date, to sort them manually (drag and drop) or by your most used apps.

## Quick ways to quiet your phone

You have three options to quiet your phone:

1. Use the side keys **+/-** to adjust the volume.
2. Drag the slider to adjust the sound level or tap:
  - **Silent**.
  - **Sleep**.
  - **Sound**.

## Notification panel and status bar

### Status bar

The status bar, located at the top of your screen, shows signal strength, ongoing and new applications as well as battery status. Indicator icons appear when something new happens, like new message or missed call.

### Notification panel

Open the notification panel to view more information about the icons in the status bar, to view your notifications and manage quick phone settings like **Wi-Fi** or **Aeroplane mode**.

### Open and close the notification panel

To open the notification panel, swipe the status bar downwards.

To close the notification panel, swipe upwards on the screen. Or tap .

### Clear the notification list

- To clear all the notifications, tap .
- To close one by one, swipe to the left or right.

### Use the quick setting buttons

1. To enable or disable features, tap:
  - **Wi-Fi.**
  - **Mobile Data.**
  - **Bluetooth.**
  - **Aeroplane mode.**

**Tip:** Use the shortcut  in the upper right corner to reach **Set**.

### Notifications on lock screen

All app notifications appear on the lock screen ready for viewing. Not only that, but you can interact with them as well. Depending on the app in question you can:

- **Swipe** to dismiss.
- **Tap** to reply.

- **Double tap** to go to the relevant app.

**Note!** To hide sensitive alerts; swipe the status bar downwards to open the notification panel and tap  →  **A general option → Advanced settings → Sound & notification → When device is locked.**

## Enter text

You can enter text, numbers and other characters using the on-screen keyboard. Your phone is preloaded with the Doro keyboard. Select a text field to open the on-screen keyboard. You can also adjust your on-screen keyboard in various ways eg select a theme to improve readability.

### Activate keyboard

- Tap a text field.

### Select Voice input or Classic keyboard

- Tap **Voice input** or **Classic keyboard** to select how to enter your text.

### Hide the keyboard

- Tap the icon  or press .

### Special characters and numerals

1. Tap **?123** for more characters.
2. Select the desired character or select =\< to view additional characters.
3. To return, select **ABC**.

### Move the cursor within text

- Tap somewhere in the text to get the marker. Put your finger on the marker  to move the cursor within the text. As you move your finger, the marker is dragged over the text. Place your finger where you want the marker to go and release your finger. The marker drops.

### Switch between upper case and lower case letters

The **Shift-key** is found to the lower left of your keyboard. Capitalisation is activated when you start entering text. Capitalisation means writing a word with its first letter in uppercase and the remaining letters in lowercase.

**Note!** Double tap **Spacebar** to make a full stop followed by a space.

- Tap **Shift key** twice to type ALL CAPS.
- Tap  to type only lower case letters.
-  to type with capitalisation.

## Smileys

1. Tap  for a list of smileys.
2. Select the desired smiley.
3. To return, select **ABC**.

## Enter text with word predictions

Start entering text and the dictionary suggests words based on the keys you have selected. Predictive text is enabled by default. When you're done typing something, you can go back and tap a misspelled or mistakenly autocorrected word. Tap the misspelled or mistakenly autocorrected word to select other possible auto corrections. This is the easiest way to fix mistakes — if you don't find the word you wanted, use the Backspace key to erase and type a new word.

## Enter text

1. Start to type a word, your keyboard may provide predictions as you type. You can tap a predicted word below the entered text to automatically complete it.
2. Tap the **Spacebar** to keep the word you typed and continue with the next word.

## Cut, copy, select all and paste

 **Cut**,  **Copy**,  **Select all**, and  **Paste** are features available inside an email, text message/box, or basically anywhere.

**Note!** Long pressing on any action bar icon will help to identify them by popping up a text bar describing the action.

1. Touch and hold the text you want to copy.
2. The selected text is highlighted . Move the marker on either end to increase or decrease the highlighted area.
3. When the highlighted area is the size you want, select  **Copy** or  **Cut**.

- 
4. Touch and hold where you want to paste. The text box **Paste** will be displayed. Press the text box to paste the text.

**Tip:** While you're in the middle of writing a message you can change the keyboard also from the quick settings in the Notification panel. To open the Notification panel, swipe the status bar downwards.

### Select keyboard and personalise your keyboard

You can select to personalise your keyboard, depending on the selected keyboard.

1. From the Home screen, tap  **Set**.
2. Tap  **A general option** →  **The keyboard options**.
3. Tap **Choose a keyboard**.
4. Tap wanted keyboard.
5. After you've done that, tap **More options** to make further personalisations to your keyboard.
6. When done, tap .

**Tip:** When entering text, open the *Notification panel* by swiping your finger from the top of the screen to the bottom, and press **Change keyboard**. Or, from the **The keyboard options** menu, set the default keyboard by pressing **Change keyboard**.

### Capture a screenshot

It's easy and often useful to get a snapshot of your phone's screen, a screenshot. To view the screenshot, see *Handle pictures in the Gallery*, p.58.

#### Take a screenshot

1. Find the screen you want to get a snapshot of.
2. Simultaneously press and hold the  **Power button** and the volume minus key .

### Connect to the Internet

Your smartphone Doro 8030 is just like any other mobile phone - you can make calls and send texts. But you can also access the internet, send and receive emails, install apps and games, and check your social

---

networking sites, like Facebook and Twitter, for this you need to be connected to Internet.

## Connect to Internet using wireless networks (Wi-Fi)

Use **Wi-Fi** to connect your phone to the Internet instead of the mobile network. You may already have Wi-Fi in your home and it's often available at workplaces. Take advantage of free networks in coffee shops, hotels, trains and libraries. Connecting to the Internet with Wi-Fi doesn't incur additional data traffic costs, unless you have to pay to get on the wireless network.

1. From the Home screen, tap  **Set** →  **My Internet connection** → **Wi-Fi**.
2. Switch  to enable. Available networks are displayed in a list. The networks can be open or secured (.
3. Select a network and tap  **Connect**. If secured, enter the password.  
For more information, contact the relevant network administrator.
4. Connected network is highlighted with **Connected**.

**Tip:**  is shown in the status bar when connected.

You can easily turn on and off **Wi-Fi** from the quick settings in the notification panel. To open the notification panel, swipe the status bar downwards.

**Note!** Keep in mind that your phone remembers Wi-Fi networks you connect to. If Wi-Fi is turned on, the phone automatically connects to the network next time you are within reach. Some open networks require you to log in to a webpage before gaining access to the network.

## Connect to Internet using mobile data

Use Mobile data to connect your phone to a network provider with a data traffic plan. What that means is that your phone can connect to the Internet anytime it is in range of your operators mobile network a service you pay for through a monthly data traffic plan. And there may be a limit to the amount of data you can use per month. You can limit your data usage by turning off mobile data. You'll then not be able to access the internet

---

using the mobile network. You can still use Wi-Fi even though mobile data is turned off.

1. From the Home screen, tap  **Set** →  **My Internet connection** → **My Mobile data settings**.
2. Switch  to enable.
3. When done, tap .

**Note!** You can easily turn on and off **Mobile Data** from the quick settings in the notification panel. To open the notification panel, swipe the status bar downwards.

**Tip:** Contact your service provider for detailed subscription costs before activating.

### Network services and costs

Your device is approved for use on the 4G LTE FDD 3 (1800), 7 (2600), 20 (800) MHz / WCDMA 1 (2100), 2 (1900), 5 (850), 8 (900) MHz / GSM 850, 900, 1800, 1900 MHz networks. To use the device, you need a subscription with a service provider.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Some operations and features are SIM card and/or network dependent or dependent on the compatibility of devices and the content formats supported. Some services are subject to a separate charge.

### Data roaming On or Off

When you travel with your device and you are switched from your own network operator's network to another, it's called roaming. The roaming state allows you to be reachable and you can make or receive phone calls regardless of where you are, but it almost always involves a surcharge for using another operators network. If you need to access the Internet or other data services using mobile data traffic, then you need to activate data roaming. To limit your data usage when abroad roaming is **Off** as default.

**Tip:**  is shown in the status bar when roaming.

Your phone can still access the Internet over the Wi-Fi connection even if you disable roaming.

**Note!** Using data services while roaming can be costly. Contact your service provider for data roaming rates before you use data roaming.

### Turn Data roaming On or Off

1. From the Home screen, tap  **Set** →  **My Internet connection** → **My Mobile data settings** → **More...**
2. Use the **Data roaming** switch  to enable/disable and confirm with **OK**.
3. When done, tap .

## Battery

### Increase the charging speed

1. To increase the charging speed, turn the device or its screen off when you charge the battery. Press the  **Power button** to view charging status.
2. The device can be used during charging, but it may take longer to fully charge the battery.
3. If the device heats up or the ambient air temperature rises, the charging speed may automatically decrease. This is a normal operating condition to prevent damage to the device.

### Battery saver mode

Once activated, the battery saver mode, helps to increase battery life. The battery saver is designed to start functioning when the battery level of your phone reaches a certain level. To save battery many features are slowed down, such as: background syncing, vibrations (vibrate on touch will be lost), email and/or message processes and more.

1. From the Home screen, tap  **Set**  **A general option** →  **Advanced settings** → **Battery** →  → **Battery saver**.
2. Switch  to enable. When you flip the switch you'll see that the colour of the switch changes and your status bar at the top of the screen turns orange. This lets you know instantly that the mode is enabled (but not necessarily engaged).

3. To automatically activate power saving mode when the remaining battery power reaches the preset level, tap **Turn on automatically** and select an option.

**Note!** The battery saver feature will turn off automatically when you charge your device.

## Reduce battery consumption

Here are some tips on how you may extend the phone's battery power by reducing battery consumption.

- Charge your phone often, preferably every day. Charging does not affect the lifetime of the battery.
- When not downloading data from the Internet, which is power consuming, disable data connections over mobile networks. Data is still transmitted over Wi-Fi.
- Turn off **Wi-Fi** when not in use. Use the notification panel to disable the features.
- Turn off **Bluetooth** when not in use. Use the notification panel to disable the features.
- Deactivate auto-syncing of apps and synchronise your applications manually, like your email, calendar and contacts.
- Use the **Battery status** menu in your device to see which applications use the most power.
- Decrease the screen brightness, see *The screen brightness*, p.30.
- When in areas with no network coverage, turn off your device or activate the **Aeroplane mode**. The device repeatedly scans for available networks which consumes power. See *Aeroplane mode*, p.34.
- The GPS is also quite battery consuming. If you want to stop apps reporting on your location automatically, make sure that Location reporting is off, see *How to disable GPS location services*, p.72.
- Use Doro original handsfree devices to listen to music. Handsfree devices consume less battery than your device's own loudspeakers.
- Lock the screen when not in use, press the  **Power button** and your display goes to sleep. See *Lock screen*, p.10.

## Navigate your phone

### Select on-screen actions

Doro's unique telephone menu is action-based and allows you to navigate your phone, by just asking yourself, What do I want to do?

For example, send an email to a contact that is available in your contact book.

1. Tap the **Send** button. You are asked, **What?** and responds by tapping **An email**.
2. You are asked **To whom?** and responds by tapping **A contact**.
3. Tap to select a contact.
4. Enter subject.
5. Tap just above **Sent from my Doro** to compose your email.
6. If desired, tap **I want to** to access more options:
7. When done, tap  **Send**.

### Call

To make a call.

**A number** to enter a phone number, see *Calls*, p.43.

**A contact** to make a call from your contact book. For more info see *Calls*, p.43 or *Contacts*, p.46.

**A recent contact** to call from the call log, see *Call log*, p.45

**My voicemail** to call your voicemail, see *Call settings*, p.45.

### View

To reach many of the most frequently used apps.

**Messages** to view messages.

**My emails** to view emails, create or add an email account, see *Email*, p.54

**My call history** to view call logs, see *Call log*, p.45

**My pictures and videos** to view stored images and videos, see *Handle pictures in the Gallery*, p.58

- 
-  **My contacts** to see and handle your contacts and your ICE card (In Case of Emergency), see *Contacts*, p.46
  -  **Something on the Internet** to search the Internet, see *Internet (Web browser)*, p.64
  -  **My calendar** to see the calendar and your events, see *Calendar*, p.68
  -  **My alarms** to view your alarms or add a new one, see *Alarm*, p.67.
  -  **The weather forecast**, see *My widgets*, p.29
  -  **My location** to go to Google maps and find your location, search for addresses, find your way and more.
  -  **My applications** to reach your apps, see *My applications screen*, p.13
  -  **My tools** to reach your tool apps.  **The magnifier** to magnify text and small parts etc, see *Magnifier*, p.66.  **My notes**, see *My notes*, p.68
  -  **My phone information** to view information and data about your phone.

## Send

To send and share messages, email, pictures and more from your phone.

-  **A message** see *Write messages*, p.53
-  **An email** , see *Write emails*, p.54
-  **A picture or video** to send a picture or video. To view stored images and videos, see *Handle pictures in the Gallery*, p.58
-  **A contact card** to send a contact card.
-  **A note**, see *My notes*, p.68.
-  **My location** to send your present location.
-  **A music file** to send a music file.
-  **A recorded sound** to record and send a recorded sound.

To access the extended Home screen

---

1. Tap the arrow  at the bottom end of the Home screen.
2. To close the extended screen, tap the arrow  again.

## Search

To find information on the Internet, your way to a place or find out what music you are listening to.

**Something on the Internet** to search the Internet.

**Directions, an address, a place** to find an address, a place or your way from your current position.

**Something in my phone** to search your phone for files, images or contacts and more, see *Search for a contact*, p.47.

## Add

To add new contacts, notes, alarms, events etc.

**A contact** to create a new contact, see *Add new contact*, p.46.

**A note** to write a note, see *My notes*, p.68.

**An alarm** to set alarms or reminders, see *Alarm*, p.67.

**An event** to book an event and get a reminder at the start time, see *Calendar*, p.68.

**An application** to add new applications, see *Doro Selection*, p.52.

**My home screen shortcuts** to select the shortcuts you want access to from the Home screen.

**My information in case of emergency (ICE)**, see *ICE (In Case of Emergency)* , p.50.

## Snap

Document an event with a picture, video or sound.

**A photo** to take photos, see *Camera*, p.55.

**A video** to record a video, see *Camera*, p.55.

**A selfie** to take a picture of yourself; see *Take a selfie*, p.56.

## Discover

To discover apps, your phone, places near you or something on the Internet.

-  **New applications** to view your apps and add new ones, see *Doro Selection*, p.52.
-  **My phone** to find more about the basic functions of your phone, see *Beginners guide - Discover your phone*, p.52.
-  **Around me** to find useful facilities nearby your current position.
-  **Something on the Internet** to search the Internet, see *Internet (Web browser)*, p.64.

## Listen

To listen to the radio, your music or to your voicemail messages.

-  **To the radio** to listen to the FM-radio, see *Listen to the radio*, p.67.
-  **To my music** to search and listen to your downloaded music, see *Music*, p.66.
-  **To a recorded sound** to search and listen to your recorded sounds, see *Listen to a recorded sound*, p.69.
-  **Voicemail messages** to listen to the message(s) you use in the voicemail and to the voicemail you have received, see *Call settings*, p.45.

## Set

To manage the settings of your phone.

-  **My alarms** to set an alarm, see *Alarm*, p.67.
-  **My Internet connection** to activate and set up your Internet connection, see *Connect to the Internet*, p.18.
-  **My other connections** to activate and set your connection with **The Bluetooth connection** or **The geolocation options**, see *The Bluetooth connection*<sup>®</sup>, p.33 or *Location based services*, p.72.

**My home screen** to personalise the Home screen with your own wallpaper and shortcuts, see *My wallpaper*, p.28 and *Home screen shortcuts*, p.29.

**An assistance option** to set your assistance button and manage your ICE information (In Case of Emergency) card, see *My assistance button* , p.48 or *ICE (In Case of Emergency)* , p.50. You can also start remote help from this menu when needed, see *My phone information*, p.36.

My Doro Manager is a convenient web service that makes owning a Doro phone even easier. You and your relatives can just log into the website and easily manage the phone's settings and content from anywhere. It's also a great way to transfer data to a new phone, or enable trusted relatives or friends to assist wherever they are. See *My Doro Manager*, p.63.

**A display option** to change the font size, contrast, screen brightness, colors.

**An audio option** to set the ringtone, the volume and to manage phone audio settings. You can configure the audio settings with your hearing aid, see *My audio setup for voice calls*, p.32.

**A general option** to set the phone's language, the Haptic feedback (vibration on/off when you press the screen), screen timeout, date and time, and the more advanced Android settings.

## Phone settings

### Where to find the settings

#### To reach the most common settings for your phone

1. From the Home screen, tap  **Set**.

#### To reach the advanced settings for your phone

1. Swipe the status bar downwards, to open the notification panel.
2. Tap  in the upper right corner.
3. Tap  **A general option** →  **Advanced settings**.

## The date and time

Your phone should already be set to the correct time, date, time format and time zone, these are provided by your network operator. If not, you can set it yourself. Do as follows to reach the settings:

1. From the Home screen, tap  **Set** →  **A general option**.
2. Tap **The date and time**.
  - **Auto time** to automatically update the time, date and time zone. **Auto time** is enabled by default.
 

**Note!** Switch  to disable and manually set time, date and time zone.
  - **Set time format** to select 24-hour format or 12-hour format.
3. When done, tap .

## The haptic feedback

When the haptic feedback is activated the device will vibrate with the sound when playing music and it will also vibrate when buttons are tapped in supported apps.

1. From the Home screen, tap  **Set** →  **A general option** →  **The haptic feedback**.
  - To disable switch . Confirm with .

## The screen timeout

You can set the length of time the device waits before turning off the display backlight.

1. From the Home screen, tap  **Set** →  **A general option** →  **My screen lock**. Tap to select one of the time intervals.
2. Confirm with .

## My wallpaper

Wallpaper is the background on the Home screen and on the Lock screen. You can change the wallpaper image into any image, such as a picture you've taken or pre-loaded images.

1. From the Home screen, tap  **Set** →  **My home screen**.

2. Tap **My wallpaper**.
3. Tap **Change**.
4. Tap **Gallery, Live wallpaper** or **Doro wallpaper**.
5. Tap an image to select it and confirm with .

**Note!** You can also reset to the default wallpaper, to reset tap **Reset**.

## Home screen shortcuts

What is a shortcut? A shortcut can be a fast track to a contact or an application.

### Add a shortcut from the Home screen

1. You can add or remove a shortcut directly from the Home screen, tap .
2. Tap  once again.
3. Select an item to add as shortcut from the pick list.
4. Confirm with .

### Add a shortcut

1. From the Home screen, tap  **Set** →  **My home screen**.
2. Tap **My shortcuts**.
3. Tap  to add and tap to select e.g. **Pin a contact** from the pick list. Confirm with .

**Note!** You need to remove a shortcut before you can replace it.

### Remove a shortcut

1. From the Home screen, tap  **Set** →  **My home screen**.
2. Tap **My shortcuts**.
3. Tap  to select a shortcut and confirm with .

## My widgets

Widgets are small apps that launch specific functions to provide information and convenient access. Turn on weather forecasts for your location, add one or more locations.

### Disable Google search bar

- To disable switch .

---

## Weather forecast display

1. Tap **My widgets**.
2. Tap **Today** to select from the pick list. Confirm with .

## Disable clock

- To disable switch . Confirm with .

## The text size

1. From the Home screen, tap  **Set** →  **A display option**.
2. Tap **Normal** and tap to select an option in the pick list.
3. When done, tap .

## The screen brightness

You can adjust the brightness of the screen. The default setting is **Automatic** and to save battery, we recommend you to keep this setting.

1. From the Home screen, tap  **Set** →  **A display option**.
2. Switch  to disable.
3. Drag the slider to adjust the screen brightness manually. The higher value the brighter the screen.
4. When done, tap .

## The text contrast

To increase the contrast of some text and images on the screen and make objects clearer and easier to identify.

1. From the Home screen, tap  **Set** →  **A display option**.
2. Switch  to enable. Confirm with .

## The colour inversion

1. From the Home screen, tap  **Set** →  **A display option**.
2. To switch to white text on dark background. When done, tap .

**Note!** All colours on your screen are inverted and you may get some pretty odd colour combinations.

## The colour correction

1. From the Home screen, tap  **Set** →  **A display option**.
2. To switch colour mode for persons with colour vision deficiency to see things more clearly. Tap to select:
  - **Disabled**
  - **Monochromacy (black and white display)**
  - **Inverted deuteranomaly**
  - **Deuteranomaly (enhance the perception of green colour) (red-green)**
  - **Inverted protanomaly**
  - **Protanomaly (enhance the perception of red colour) (red-green)**
  - **Inverted tritanomaly**
  - **Tritanomaly (enhance the perception of blue colour) (blue-yellow)**

When done, tap .

## Improve accessibility further

Improve accessibility further with features that make the device easier to use for users who have impaired vision, hearing, and reduced dexterity.

1. From the Home screen, tap  **Set** →  **A general option** →  **Advanced settings** →  **Accessibility**.

## The volume

Adjust settings for various sounds on your device.

1. From the Home screen, tap  **Set** →  **An audio option** →  **The volume**.
2. Drag the slider to adjust the volume (or press the minus or plus icon).
  - **Ringtone and notifications.**
  - **Music, videos and games.**
  - **Alarms.**
  - **Also vibrate for calls.**
3. When done, tap .

**Tip:** You can also press the volume keys to adjust the volume. During a call the volume keys adjust the call volume and from standby they adjust the ringtone volume.

## My ringtone

Adjust settings for various sounds on your device.

1. From the Home screen, tap  **Set** →  **An audio option** →  **My ringtone**.

**Tip:** Tap  to play and tap  to stop listening.

- **Ringtone** and tap to select an option in the pick list. Confirm with .
- **Message & Notification tone** tap to select an option in the pick list.
- **Recurrent notification tone** switch  to enable.
- **Power ON/OFF tone** switch  to enable.
- **Charging tone** switch  to enable.

2. When done, tap  to confirm.

**Tip:** You can also press the volume keys on the side of the phone to adjust the volume.

## My audio setup for voice calls

If you use a hearing aid or have hearing difficulties when using the telephone in a noisy environment, you can customise the phones audio settings.

1. From the Home screen, tap  **Set** →  **An audio option** →  **My audio setup for voice calls**.
2. Tap **Normal** to select:
  - **Normal** for normal hearing in normal conditions.
  - **High** for moderate hearing impairment or use in noisy environment.
  - **HAC mode** for use with hearing aid.
3. When done, tap .

---

## Hearing aid compatible (HAC)

This telephone is hearing aid compatible. Hearing aid compatibility is not a guarantee that a specific hearing aid will work with a specific telephone. Mobile telephones contain radio transmitters that may interfere with hearing aid performance. This phone has been tested for use with hearing aids, for some of the wireless technologies that it uses, but there may be some newer wireless technologies that have not been tested yet for use with hearing aids. To ensure that a specific hearing aid works well with this telephone, test them together before making a purchase.

The standard for hearing aid compatibility contains two types of ratings:

- **M:** To use your hearing aid in this mode, make sure that your hearing aid is set to **M-mode** or acoustic coupling mode, and position the telephone's receiver near the hearing aid's built-in microphone. For the best results, try using the telephone in different positions relative to your hearing aid—for example, placing the receiver slightly above the ear may result in better performance for hearing aids with microphones positioned behind the ear.
- **T:** To use your hearing aid in this mode, make sure that your hearing aid is set to **T-mode** or telecoil coupling mode (not all hearing aids have this mode). For the best results, try using the telephone in different positions relative to your hearing aid—for example, placing the receiver slightly below or in front of the ear may result in better performance.

## The Bluetooth connection<sup>®</sup>

You can connect wirelessly to other Bluetooth<sup>®</sup> compatible devices such as headsets or other phones.

**Note!** Bluetooth can use a lot of battery power. Don't forget to turn off when not using.

### Pair with other Bluetooth devices

1. From the Home screen, tap  **Set** →  **My other connections** → **The Bluetooth connection.**
2. Switch  to enable.
3. Tap to select the unit that you want to connect to.

---

**Note!** If you can't spot the unit that you want to connect with, tap **Refresh**, to refresh the list. Or you can request to make the device visible to others, a selection you make on the other unit. Refer to the other device's user manual.

4. You may be asked to input a password or to press a button. If prompted, input the password or otherwise acknowledge the connection on your phone or the other device.
5. After you acknowledge the password (or not), the units are connected and communicating. You can begin using the device.
6. Tap **I want to** to view available options.

**Note!** Because the devices are now paired, when you turn on Bluetooth on your device and the other device is on, the connection reestablishes and they'll stay paired until you unpair them.

## Unpair devices

1. From the Home screen, tap  **Set** →  **My other connections** → **The Bluetooth connection**.
2. The paired devices are listed.
3. Tap  next to the device name that you want to unpair.
4. Tap **FORGET**.

**Note!** To disconnect you can turn off the other unit or disable Bluetooth on that device.

## Aeroplane mode

In **Aeroplane mode** you can't make or receive calls, surf the web or download emails, or do anything that requires an Internet connection, this is to prevent disturbance to sensitive equipment. You can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage.

When you take your phone abroad, you can keep it in flight mode. If you do that, there's no chance of data roaming charges, and you can still enable Wi-Fi. Enable **Aeroplane mode** when in areas with no network coverage to save battery since the phone repeatedly scans for available networks and this consumes power. You can be notified by alarms, if alarms are activated.

1. From the Home screen, tap  **Set** →  **A general option** → **Advanced settings**.
2. Tap **More**.
3. Switch  to enable.

**Tip:** To enable you can also press and hold the  **Power button** and then select **Aeroplane mode** in the menu that opens. You can also enable flight mode from the quick settings in the *Notification panel*.

**Tip:**  is shown in the status bar when enabled.

You can easily turn on and off **Aeroplane mode** from the quick settings in the notification panel. To open the notification panel, swipe the status bar downwards.

## Connect the phone to a computer

Connect the phone to a computer and start transferring pictures, music and other file types. All you have to do is connect a USB cable between the phone and computer. From your computer's file explorer, you can drag and drop content between your phone and the computer.

**Note!** You might not be able to transfer some copyright-protected material.

**Tip:** If default storage location is set to memory card, all photos and videos taken by the phone are stored in the **DCIM/Camera** folder on the memory card.

## Drag and drop content between phone and a computer

1. Connect your phone to a computer using a USB cable.

---

**Note!** You might need to wait for the driver to be installed on your computer before you can access the phone.

Mac users, see <https://www.android.com/filetransfer/>.

2. You are prompted, on the computer screen, to choose what to do when you connect your phone to a computer.
3. Select to open the device and view files in the computers file explorer.
4. Wait until the phone/memory card appears as external disks in the computers file explorer.
5. Drag and drop selected files between the phone and the computer.
6. If necessary, also use the **Safe to remove hardware** function on your computer.
7. When done, remove the USB cable.

**Tip:** You can select different connection modes for you phone when connecting to a computer. Swipe down the status bar and select

 **Connected as a media device.**

**Note!** When the phone/memory card is mounted to the computer, the phone cannot access the memory card. Some functionality and applications in the phone, such as the camera, may not be accessible. You can transfer files by using a USB cable on most devices and operating systems supporting a USB Mass Storage interface.

## My phone information

To access device information such as the current software version, battery status or to update device software.

1. From the Home screen, tap  **View** →  **My phone information.**
  - **Battery info** access information and statistics about battery status and battery usage history.
  - **Storage** check the status of the used and available memory.
  - **Phone status** to check system and software versions and more.
  - **Device update** to check for available software updates.
  - **Legal information** to see terms and conditions and other legal information.

---

## Updating your device

When your device is connected to a Wi-Fi network it's directly updated to the latest software by the firmware over-the-air (FOTA) service.

### To allow your device to update when connected to the Mobile network

1. From the Home screen, tap  **View** →

 **My phone information** → **Device update** → **Always download**.

To update device software you need to be connected to the Internet. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic, but you can also update over the mobile data network. If needed contact your service provider for detailed subscription costs before starting to update you device.

#### IMPORTANT!

We recommend that you always update your device to the latest software version to get optimal performance and the latest enhancements. When a new software is available, a notification message is shown in the status bar, or as a notification. Select it to start downloading. The download time may vary depending on Internet connection.

**Note!** During the installation, your phone will be temporarily out of service, even for emergency calls. All contacts, photos, settings, etc. will remain safely stored in the phone. Do not interrupt the installation.

## Backup

It's a good idea to backup your phone on a regular basis. Don't wait backing up your phone until it's too late. There's no universal method to back up the information on your Android phone. Here we will mention some ways to help you keep your information. We recommend that you regularly copy your photos from the phone's internal storage to your computer as a form of backup, see *Connect the phone to a computer*, p.35. These files are found in the DCIM folder on your phone. DCIM stands for Digital Camera IMages and it is the default directory structure for digital cameras and for smartphone cameras.

Your Google account information is set to back up automatically. Follow below settings to make sure your contacts, system settings, apps,

calendar, and email will be restored whenever you set up a new device with that same Gmail account.

## Backup with Google

1. From the Home screen, tap  **Set** →  **A general option** → **Advanced settings**.
2. Scroll to and select **Accounts** and select Google™.
3. Tap the green synchronisation icon next to your Gmail address.
4. Make sure that every wanted item in the list is activated. Each item needs to be activated if you want it to be backed up.
5. Press  three times to save and return to **Advanced settings**.
6. Select **Backup & reset**.
7. Make sure that **Back up my data** is switched on.  
To immediately do a backup, tap **Backup account**.

There are many apps that allow you to backup your photos, applications and much more. Some apps even offer cloud storage that allows mobile uploading, and others that allow you to restore your data should you need to. Try searching  **Play Store**, see *Google™ Play Store*, p.42

## Reset the phone

### IMPORTANT!

Resetting the phone means that most information will be lost such as downloaded and installed applications, accounts, system and application data and settings. Be sure to backup any data and files you want to keep before you perform the reset. A backup is a safety copy of information. Carefully read all the text below before you start.

The reason to perform a reset might be a persistent problem that is impossible to solve or if you want to pass the phone to someone else.

Note that everything added to the phone since you got it will be erased.

### Exceptions

- Everything saved on an **SD card** if you have one installed (see *Insert the memory card*, p.4 and *External memory*, p.39).
- Applications and data by Google™ — if the box by **Back up my data** is checked, see *Backup*, p.37.

- Information you have stored in any cloud storages (or on a computer, see *Connect the phone to a computer*, p.35).

## Reset the phone

1. From the Home screen, tap  **Set** →  **A general option** →  
••• **Advanced settings** → **Backup & reset**.
2. Select **Factory data reset**. Carefully read the on-screen information, it is **important!**
3. Select **Reset phone**.
4. Select **Erase everything**.

### CAUTION

This is the last step before ALL data from the device, including Google or other account settings, system and application data and settings will be permanently erased.

5. After your phone resets, it will be set back to factory defaults and will be just like it was when it came out of the box.

## Memory and storage

**Note!** When you update the phone the available capacity may change.

Your phone has different types of memory and storage possibilities.

### Internal storage

The internal storage is used to store downloaded or transferred content along with your personal settings and data. Examples are alarm, volume and language settings, emails, bookmarks, contacts, calendar events, photos, videos and music.

### External memory

SD stands for Secure Digital. There are many different media card standards. Lower-capacity cards store less information. Use only compatible memory cards with this device. The phone works with or without a SD card installed.

You can use an external memory card (compatible card type for this device: **microSD**, **microSDHC** max 32 GB) to get more storage space. Most applications can read data from a memory card but only certain apps

---

can save files to this type of memory. You can, for example, set the camera application to save photos directly to the memory card.

**Note!** If you insert an external memory, it is recommended you change the default storage location. This allows you to save more files on your phone, like pictures and videos.

## Free up memory space

The memory in your device tends to fill up as a result of normal usage. If your phone starts to slow down, or applications suddenly shut down, consider the following:

### Delete pictures

- If you use your phone to take a lot of pictures, remember to back them up to your computer every now and again. Not only will this prevent you from losing any photos if anything were to happen to your phone, but it also gives you the opportunity to delete them from your phone and free up space. You can access your pictures by simply plugging your phone into your computer via a USB cable, see *Connect the phone to a computer*, p.35.
- There are also several services to use if you want to back up your photos – in many cases, automatically. Google, for example, has an automatic upload feature that will put your photos into a private album on Google+, and even create mini-albums for you.

### Clear the cache memory

What is cache? When you are surfing the web or using apps on your phone's browser, those websites that you visit will be stored on your phone in an area of memory called cache. The reason is that the next time you visit the same website or app the phone will load it from cache memory instead of downloading everything again from the server which, take up time and bandwidth.

1. From the Home screen, tap  **Set** →  **A general option** → **Advanced settings**.
2. Select **Storage**.
3. Select **Cached data** and confirm.
4. Press  to return.

---

**Tip:** The cache will fill up again over time, and you'll want to delete it again.

## Uninstall applications that you don't use

1. From the Home screen, tap  **View** →  **My applications**.
2. Tap **I want to**.
3. Tap **Uninstall applications**.
4. Tap  for the items to delete.
5. Tap **OK** to confirm.

**Tip:** All purchases are managed by your Gmail account. If you want to install a particular app again later on, as long as you are signed in with your original Gmail account you won't be charged again for the same app.

## Change the SIM PIN code

1. From the Home screen, tap  **Set** →  **A general option** →  **Advanced settings**.
2. Select **Security**.
3. Select **Set up SIM card lock** → **Change SIM PIN**.
4. Enter old PIN and select **OK**.
5. Enter new PIN and select **OK**. Enter new PIN again and select **OK** once more. When done, **SIM PIN changed successfully** will appear.

## Require PIN code at startup

1. From the Home screen, tap  **Set** →  **A general option** →  **Advanced settings**.
2. Select **Security**.
3. Select **Set up SIM card lock** → **Lock SIM card**.
  - Tick to activate PIN code. You need to enter the PIN code every time the phone is started.
  - Tick to deactivate PIN code.

### WARNING

If the SIM card is lost/stolen it is unprotected.

# Google™ Play Store

## IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

**Note!** You need to have a Google™ account to use **Play Store**. Your Gmail account is also your Google Account, so you can use your same Gmail username and password to use other Google products like YouTube, Google+, Google Play, and Google Drive.

Browse the available applications and games through different categories or through the lists like Top paid and Top Free. You can also search for a specific application or game.

Some applications need to be purchased. The cost is shown in the application description as well as if it is free. You pay using Google™ Wallet, which can be registered when setting up a Google™ account or the first time for a purchase or by using any other available payment method.

## Install applications

1. From the Home screen, tap  **Play Store**.
2. Find an item you wish to download by browsing categories or by using the search function.
3. Tap the item to view its details, and follow the instructions to complete the installation/purchase.

**Tip:** All downloaded applications can be found in  **Play Store**. Tap , and tap to select **My apps & games**. Here you can select IN och A

## Open an installed application

1. In  **Play Store**, tap  and tap to select **My apps & games**.
2. Select the downloaded application. If needed tap **Open**.

## Update an installed application

1. In  **Play Store**, tap  and tap to select **My apps & games**.

2. You can select to update all applications that needs to be updated, tap **Update all**, or select a specific application and tap **→ Update** and confirm.

## Uninstall applications

1. In  **Play Store**, tap  and tap to select **My apps & games**.
2. Tap to select an application, tap **→ Uninstall** and confirm.

## Calls

### Make a call

To call a contact that is currently not available in your contact book, see also  *Call*, p.23.

1. From the Home screen, tap  **Call**.
2. Tap  **A number**.
3. Enter the phone number, you are offered suggestions as you type.
4. Tap  **Call** to call or tap directly on the suggested contact.

**Tip:** For international calls, use the international prefix + before the country code. Touch and hold **0** until + is shown.

### Answer a call

The phone rings or vibrates to alert you to an incoming call.

**Note!** The sound you hear when the phone rings is known as the *ringtone*, see *My ringtone*, p.32. You can set your phone to play a number of ringtones, for example depending on who's calling, or you can set a universal ringtone.

1. The touchscreen display lights up, giving you more information about the call.
2. You now have some options.
  - **Answer the call** tap  **Accept** or slide it to the right
  - **Ignore the call** tap (or slide left)  **Decline** to decline without answering (busy signal)
  - **Silence the ringer** press the volume button (up or down) to silence the ringer

---

## End a call

- Tap  **End call** to end.

## Options during a call

### Volume control

- Use the side volume keys to adjust the call volume, the selected level is shown on-screen.

### Mute

1. During a voice call, select .
2. To disable, select  again.

### Keypad (tone sending)

1. During a voice call, select .
2. Enter number.
3. To close, select  again.

### Loudspeaker

1. During a voice call, select .
2. Speak clearly into the microphone at a maximum distance of 1 m. Use **+** or **-** to adjust the loudspeaker volume.
3. To disable, select  again.

**Note!** During a voice call more actions are available. Tap **I want to** to view your selectable actions. Some content in your device may differ depending on the region, service provider, model specifications, or software.

## Headset

### Headset

- Connect a headset to the headset socket. The internal microphone in the phone is automatically disconnected.

### CAUTION

Using a headset at high volume may damage your hearing. Adjust the volume level carefully when using a headset.

## Call log

1. From the Home screen, select  **View** →  **My call history**.
2. Tap a number or a contact to:
  - To call, tap  **Call**.
  - For more options tap **I want to**.

## Clear the call log

1. From the Home screen, select  **View** →  **My call history**.
2. Tap **I want to** and select **Clear my call history**.
3. Tap the white square next to the items to delete, or tap **Select all**.
4. Tap  and select **OK** or **Cancel**.

## Call settings

### Lock the screen during calls, call log limitation and more

1. From the Home screen, tap  **Call**.
2. Tap  **A number** → **I want to** → **Open settings** →:
  - Enable **Lock during calls** to avoid making touch mistakes during a call. Your phone contains proximity sensors that should disable the touchscreen when you are on a call. But in some rare occasions when the phone is held at an angle or slightly off the face the proximity sensors may report that your face is not close enough and the touchscreen is enabled. This has resulted in accidental calls, or disconnected the ongoing call. When done, tap .
  - Disable **Direct calls** to help to avoid making accidental calls by adding a confirmation dialog to any phone call that you are about to make. The confirmation dialog is helpful to double check that you really want to make a phone call. The default setting is **Enabled**. When done, tap .

**Note!** Only applies to calls made directly from  **View** →  **My contacts**.

- Enable **Call log limitation** to reduce your phone's call history to show only your 100 most recent calls.

- **Call Timer** to view and reset the total time for outgoing and incoming calls since you started to use the phone or since the latest reset. The most recent call is displayed with both time and receiver. Select **OK** or **Cancel**.
- **Advanced settings** to reach and manage more options, such as **Voicemail**, **Fixed Dialling Numbers**, **Call forwarding** and **Call barring**.

**Note!** The features in Advanced settings are network services and you may need to subscribe to them first. For more information and for the Voicemail number, contact your service provider.

3. When done, tap .

## SOS calls

As long as the phone is switched on, you can always make an SOS call.

1. From the Home screen, tap  **Call**.
2. Tap  **A number** to enter the main local emergency number for your present location.
3. Tap  **Call**.

Some networks accept calls to emergency numbers without a valid SIM card. Contact your service provider for more information.

## Contacts

### Add new contact

Your contacts are automatically synced with your Google account (provided that you are logged onto your Google account). To manage synchronisation for your Google account, see *Backup*, p.37.

1. From the Home screen, tap  **Add** →  **A contact**.
2. Enter contact information and continue to fill in the information you know, to proceed, tap  **Next**.
3. Your new contact is created when you reach and tap  **Save**.

**Tip:** To hide the keyboard tap  and to activate the keyboard simply tap a text field once again.

## Search for a contact

1. From the Home screen, tap  **Search** →  **Something in my phone.**
2. Start to enter a name in the search bar  **Search.** You are offered suggestions as you type.
3. Select the correct match by tapping it.

**Note!** See also *Google search*, p.64

## Manage your contacts

1. From the Home screen, tap  **View** →  **My contacts.**
2. Tap to open an existing contact.
 

**Tip:** Try to tap the **I want to** before you tap an existing contact, this way you may get another set of menu options.
3. Tap **Edit.**
4. Tap  to add as favourite contact or tap  to remove as favourite.
5. Tap  to add image.
6. Follow the on-screen instructions to complete contact information.
7. Tap  **Save**, when you are done. Your contacts are automatically synced with your Google account (provided that you are logged onto your Google account). To manage synchronisation for your Google account, see *Backup*, p.37.

**Tip:** The favourite-contacts are easily found with . To remove as favourite, tap a favourite contact and tap **I want to** to tap **Remove as favourite.**

## Import and export contacts

If you have a Doro service such as My Doro Manager or Connect & Care, you can use that service to import and export to/from SIM/SD card.

### Import contacts from storage services to your device

1. From the Home screen, tap  **View** →  **My contacts.**

2. Tap **I want to**.
3. Tap **Import/Export** to select an import option from the pick list.
4. Tap  to confirm.

## How to find the ICE contacts

### From locked screen

1. Swipe to unlock the screen.
2. Tap **Ice** to retrieve stored ICE information.
3. Tap  to call the Ice contact.

**Note!** Only applies when screen lock method is set to **Pattern, PIN** or **Password**. To activate the screen lock or change the type of screen lock, tap  **Set** →  **A general option** →  **My screen lock** see *Screen lock*, p.11.

### From Contact book

1. From the Home screen, tap  **View** →  **My contacts** →  **In Case of Emergency (ICE)**.
2. Swipe to view all information.
3. Tap **Edit**, follow the on-screen instructions to complete the ICE-card information.
4. When done, tap .

**Note!** Applies when the phone is unlocked. To activate the screen lock or change the type of screen lock, see *Screen lock*, p.11.

## An assistance option

### My assistance button

#### CAUTION

When an assistance call is activated the phone is pre-set to handsfree/speakerphone mode. Do not hold the device near your ear when the handsfree mode is in use, because the volume may be extremely loud.

In order to possibly make everyday safer, the phone has an assistance button . The assistance button makes it easy to contact the help

---

numbers you have predefined in the Assistance number list . Before the assistance button can be used, the assistance function has to be activated, phone numbers added to the number list and, the text message edited with the information you want to send.

## Make an assistance call

- Press and hold the assistance button  for 3 seconds, or press it three (3) times within 1 second. The assistance call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pressing **Cancel**.
- An assistance text message (SMS) can be sent to all recipients.
- A positioning text message (SMS) can be sent to all recipients.
- The first recipient in the list is dialled. If the call is not answered within 25 seconds, the next number is dialled. Dialling is repeated 3 times or until the call is answered, or until **Cancel** is pressed.

## Assistance button settings

You can select to use your Assistance button together with Connect & Care, see *Connect & Care*, p.59. Below we describe how to set up the Assistance button.

1. From the Home screen, tap  **Set** →  **An assistance option** →   
**My assistance button.**
2. Tap **Configure**.

## Application

Set what application that should be linked with the assistance button.

- Tap **Configure** to choose a different application for the assistance button.

**Note!** Not all steps needs to be done, but at least **Assistance button configuration** and one contact in the **Assistance numbers list** must be set up to activate this feature.

## Set the volume level for the assistance calls

Select the signal type for the assistance sequence.

**Note!** This sets the signal of your device, NOT the receiver's signal.

- **High.**

- **Low.**
- **Silent.**

### Select how to activate the assistance function

- **Press 3 times** to activate by pressing the button 3 times within 1 second.
- **Long press** to activate by pressing and holding the button for approximately 3 seconds, or press it twice within 1 second.

### Select your assistance contacts

1. Tap **Add contact**.
2. Select a contact to add.
3. Tap **Add contact** when you are done. To delete a contact, press the minus sign after the number.

**Note!** Some private security companies can accept automatic calls from their clients. Always contact the security company before using their phone number. Programming '999' into the assistance button is blocked.

### Alert message

- A text message can be sent to the contacts in the list when the assistance button is pressed. You may edit the SMS to make it more personal. If required, tap the text field to modify the message. Switch  to enable or to disable the message.

### Location message

If you send an assistance alert it can be of great help for your help contacts to know your current position. This allows them to be able to assist you in the fastest possible way. The position SMS lets you share your GPS coordinates via a text message to your assistance contacts. The position information is based on the GPS position at the time for the assistance call, and if that position can't be detected, your latest known position is shared.

- Switch  to enable or to disable.

When done, select .

### ICE (In Case of Emergency)

In the event of a trauma, it is critical to have this information as early as possible to increase the chances of survival. Add ICE contact to improve

your own safety. First responders can access additional information such as medication and next of kin from your phone in case of an emergency. All fields are optional, but the more information provided the better.

**Note!** Your ICE contacts are fetched from your Contact book and you need to make sure that relevant information is stored on each ICE contact.

1. From the Home screen, tap  **Set** →  **An assistance option** → **My information in case of emergency (ICE)**.
2. Select **Create ICE** and enter your medical information. Follow the on-screen instructions to complete the ICE-card information.
3. When done, tap .

**Note!** To remove an already added ICE contact tap the minus sign next to the ICE contact. Tap  to confirm.

## Remote help

Let someone you trust control your phone remotely. Allow access so they can remotely administrate and transfer files, help you to perform maintenance tasks and with problems should they occur.

### To connect a remote support session

1. From the Home screen, tap  **Set** →  **An assistance option** →  **Remote help**.
2. Share **Your ID** with your personal tech support to allow remote control. Tap **Send my ID...** to select how to share your ID.
3. Follow the on-screen instructions.
4. To quit TeamViewer, open the Notification panel, swipe the status bar downwards. Click QuickSupport and tap  in the upper right corner.
5. Confirm with **Close**.

**Note!** All TeamViewer connections are highly encrypted and are thus protected from being accessed by third parties. For detailed technical information regarding connections, security and data privacy in TeamViewer, see the security statement at <http://www.teamviewer.com/en/products/security.aspx>.

## Applications

Applications can be a program or game that you can use on your Doro 8030. Depending on market and service provider, the pre-installed applications can vary. Some applications need Internet access. Contact your service provider for detailed subscription costs before activating. Some applications need to be purchased. The cost is shown in the application description as well as if it is free. Using downloaded and installed applications does not cost anything, except if an Internet connection is needed.

Use *Doro Selection* or *Google™ Play Store* to download and install all the applications you need.

### Beginners guide - Discover your phone

Get guided help and useful tip to discover the basics of your new phone.

- From the Home screen, tap  **Discover** →  **My phone** →  **General features**.
- To exit the guide tap **I want to** and tap **Exit**.

### Doro Selection

The easiest way to look for applications is to use the **Doro Selection**. Searches are made easier thanks to categories with a selection of apps for such as home, digital life, news, health and wellness, finance and more. You can also use **Recommended applications**: as well as **View by categories** to find apps.

1. From the Home screen, tap  **Add** →  **An application**.
2. Tap an item to select it:
  - **Recommended applications**: tap to select an app.
  - **View by categories** to select an option in the pick list. Confirm with .
  - **Search on Google Play Store** to reach **Play Store**.
  - **My applications** to view the applications downloaded by you.
  - **Recommended** to view recommendations sent to you via **My Doro Manager** see *My Doro Manager*, p.63.

---

## Messages

### Write messages

You can send different types of messages from your phone. Here we will explain how to send a text message, but you can also send other message types from the  **Send** menu.

**Tip:** Text messages (sms) are delivered immediately to a device that most of us have with us at all times, a text message also represents a more personal and intimate connection. Most modern smartphones can receive emails (that may be preferable for more formal communications or inquiries) but texting remains simpler and is the only option for those using a more basic cell phone.

1. From the Home screen, tap  **Send** →  **A message**.
2. Tap  **A number**.
3. Enter the phone number, you are offered suggestions as you type.
4. Tap **Pick number** or tap the suggested contact.
5. Compose your message.

**Note!** Access more options through the menu key **I want to**.

6. When done, tap  **Send**.

**Note!** If you choose to add multiple recipients, you may be charged for each recipient. You may also incur additional charges for sending messages when you are roaming. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic.

### Messages settings

1. From the Home screen, tap  **View** →  **My messages**.
2. Tap **I want to**.
3. Tap **Open settings**.
  - Tap to select the features to change or switch  to enable or disable them.
4. When done, tap .

**Note!** Message settings are normally already set and should not need to be altered by you, unless, of course you want to make changes. Some features are network services and you may need to subscribe to them first. For more information contact your service provider.

## Email

### Set up email account

When opening email the first time you are prompted to set up an email account.

#### IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

**Tip:** Gmail is always available under **Google apps**.

### To activate your email account

1. From the Home screen, tap  **View** →  **My emails**.
2. Tap **+** **Add an account**.
  - **Add existing account**
  - **Create Gmail account**
3. Tap  to confirm.
4. If desired, tap **I want to** to access more options.
  - **Manage accounts** to select account or **Add another account?**  
Press **I want to** again to get more options.
5. If needed enter requested settings manually and tap  when done. Contact your email provider for detailed information.

### Write emails

Here we will explain how to send an email to a contact that is available in your contact book.

1. From the Home screen, tap  **Send** →  **An email**.
2. Tap  **A contact**.
3. Tap to select a contact.

4. Enter subject.
5. Tap just above **Sent from my Doro** to compose your email.
6. If desired, tap **I want to** to access more options.
7. When done, tap  **Send**.

## Read emails

1. From the Home screen, tap  **View** →  **My emails**.
2. Tap to read an mail.
3. Tap **Reply** / **Forward** to select an option from the pick list. Confirm with .
4. Compose your email.
5. If desired, tap **I want to** to access more options.
6. When done, tap  **Send**.

## Email settings

1. From the Home screen, tap  **View** →  **My emails**.
2. Tap **I want to**.
3. Tap **Open settings** to access more options.
4. Tap to select an option.
5. When done, tap .

## Camera

Use the camera to take photos or record videos.

**Tip:** Press and hold the Camera button to activate the camera from any screen or mode except in the **Power off** mode. The Camera button is located on the lower right side of the phone.

To get sharp photos, wipe the lens clean with a dry cloth.

**Note!** Do not take photos or record videos of other people without their permission. Do not take a photo or record a video where prohibited or where you may be violating others' integrity.

---

## Focus

- On the preview screen, tap the image on the screen where you want the camera to focus.

## Zoom

- On the preview screen, place two fingers together on the screen and spread them apart to zoom in and pinch them together to zoom out.

## Take photos

1. From the Home screen, tap  **Snap** →  **A photo**.
2. Tap , or press the side button .

## Record a video

1. From the Home screen, tap  **Snap** →  **A video**.
2. On the camera preview screen, tap  to switch between front and back camera.
3. Tap  to record a video. Press  to stop video recording.

## Take a selfie

Selfie means to take a picture of yourself. You can use the front camera to take self-portraits.

1. On the camera preview screen, tap  to switch to the front camera for self-portraits.
2. Face the front camera. Move the camera around until you find a pleasing pose.
3. When you see your face in the display, tap  or press the side button  to take a picture of yourself.

## Camera settings

**Note!** The available options may vary depending on the shooting mode and which camera is being used.

On the preview screen, you can make general camera settings.

1. Tap  **More Options** to access the list of shooting modes.

- Tap **Grid** to select  **On** or  **Off** to focus on the target, accurately and precisely
- **Timer** to select  **5 seconds**,  **10 seconds** or  **Timer off**.

### Camera resolution

Low resolutions are just fine for uploading to Facebook. The higher the resolution the clearer the photo will be, however high resolution takes up more storage space. High-resolution images are great for printing photos and photo-editing.

1. Select  **More Options**.
2. Select  **Settings** → **Photo mode** → **Back camera** and select:
  - **5MP** (default setting)
  - **3MP**
  - **2MP**
  - **VGA** (resolution of 640 × 480 pixels)
3. Select **Resolution (front camera)**:
  - **VGA** (resolution of 640 × 480 pixels)
4. When done, tap .

### Video resolution

**Note!** Once taken, videos formats cannot be changed to meet MMS standards. Make sure to take your videos in MMS format if you plan to send them as MMS.

1. Select  **More Options**.
2. Select  **Settings** → **Video mode** → **Resolution (back camera)** and select:
  - **720P** for higher standard definition resolution.
  - **480P** (default setting) for standard definition resolution.
  - **MMS** will automatically configure the settings for MMS.
3. Select **Resolution (front camera)**:
  - **480P** (default setting)
  - **MMS**

4. When done, tap .

## Options

1. Tap  **More Options**.
2. Tap  **Settings** → **Options** and select:
  - **Exposure control**, switch  to enable.  
Once activated, exposure can be set via  **More Options** →  **Exposure control**.
  - **Shutter sound**. Switch  to enable.
  - **Save on SD card**. Switch  to enable.  
  
**Note!** This option is only available when an SD card is inserted.  
See *External memory*, p.39
  - **Video stabilization**. Switch  to enable.
3. When done, tap .

**Tip:** You can also access your gallery from camera mode, on the camera preview screen, select the thumbnail in the lower left corner.

## Handle pictures in the Gallery

### View images or videos

All pictures taken by the camera, received photos and recorded videos are stored in **My gallery**.

1. From the Home screen, tap  **View** →  **My pictures and videos**.
2. Select the photo/video to view/play.
3. Swipe to the left or right to skip to the next image, you can also tap the arrows to do so.
4. To exit press .

**Tip:** After you have taken a photo you can access the Gallery from camera mode, by tapping .

### Manage photos or videos

1. From the Home screen, tap  **View** →  **My pictures and videos**.

- 
2. From here you can tap **I want to** to access more options.
    - **Display** to access even more options.
    - **Manage favourite**
    - **Delete picture(s)**
    - **Open settings**
  3. When done, tap .
  4. Select the photo/video to view/play.
  5. From here you can tap **I want to** to access more options.
    - **Edit this picture**
      - **Crop picture**
      - **Rotate picture**
    - **Set this picture as**
    - **Share this picture**
    - **Picture details**
    - **Add to favourites**
    - **Delete this picture**
  6. When done, tap .

## Connect & Care

**Note!** You need to have Internet access to use most of the features in Connect & Care. Depending on how you use your phone, it can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you contact your mobile operator about data rates. Using data services while roaming can be costly. Check with your mobile operator for data roaming rates before you use data roaming.

Connect & Care is an application that gives you the opportunity to get help from a **helper** i.e. a friend or relative with a smart device that can run the Connect & Care application. The help can be carried out from anywhere (remote help). A **helper** is a friend or relative.

**Note!** In order to use some of the features of Connect & Care, either the Doro 8030 user or the helper needs to have a Care service subscription with Doro.

## Getting started — Install the application

### Create account on the Doro 8030

1. From the Home screen, tap  **My apps** →  **Connect & Care**.
2. Follow the on-screen instructions to complete the account setup.

### Install the application on the helper's device

1. Go to  **Play Store** or **App Store**.
2. Install the  **Connect & Care** helper application to the helper's device.

**Note!** You can also use this method to update your Connect and Care app to the latest version.

## Connect a helper to the Doro 8030

The request can be sent from either the 8030 user's or the helper's device.

### Send a connection request

1. From the  **Connect & Care**, open  **Contacts** (available through the menu key  if not visible on screen).
2. Tap **Add Contacts** and select the contact from the contact list on your phone.
3. Once the request has been sent from either you or a helper, it needs to be accepted by the other person.

### Accept/Decline a connection request

1. From the  **Connect & Care**, open  **Contacts** (available through the menu key  if not visible on screen).
2. Tap the pending invitation to connect. (Tapping the menu key  is equivalent to immediately accept the invitation).
3. **Accept** or **Decline** the contact request.
4. After accepting a contact request, select to share information with the contact or not (this option is only available on the Doro 8030 and only if a Care service subscription exists).
5. When done, tap .

---

**Note!** Even when the Doro 8030 user selects to share information with a helper, only the information available within the Connect & Care application is shared. Through the remote setup interface the current value for some settings can also be shared, but personal information on the Doro 8030, that is not stored inside the Connect & Care application, is still personal.

### Open a contact profile

1. From the  **Connect & Care**, open  **Contacts** (available through the menu key  if not visible on screen).
2. Tap the contact in the contact list to open their profile.

### Remote setup

#### Getting started — Enable remote setup

##### In the helper's phone

1. Open the Doro 8030 user's profile in  **Connect & Care**.
2. Tap **Remote setup**.
3. Tap  settings icon access request (only needed if Care service subscription already exists).

##### In the Doro 8030

1. From the  **Connect & Care**, open **Notifications** (available through the menu key  if not visible on screen).  
**Accept** or **Decline** the remote setup offer.

#### How to use Remote setup

##### From the helpers phone

1. From the  **Connect & Care**, open the **User's profile**.
2. Tap **Remote setup** to change settings on the Doro 8030 or **Phone status** to see some phone information about the Doro 8030.

**Note!** Changing settings on the Doro 8030 through the remote setup interface will in most cases take effect immediately, without the need for any interaction from the Doro 8030 user.

---

## How to activate Care service subscription

This can be done either from the Doro 8030 phone if the Doro 8030 user will pay for the subscription, or from a helper's phone if the helper will pay for the subscription.

### From the helper's phone

1. From the  **Connect & Care**, open the **User's profile** and follow the on-screen instructions.
2. Tap **Activate the Care services** and follow the on-screen instructions.
3. The Doro 8030 user then has to **Accept** the Care service offer on their phone.
4. Both the Doro 8030 user and the helper can now access additional features via the services tab and the user profiles.

### From the Doro 8030

1. From the  **Connect & Care**, open the  **Services** (available through the menu key  if not visible on screen).
2. Follow the on-screen instructions to complete the setup.

**Note!** Only one care service subscription is needed even if the Doro 8030 user has multiple helpers.

3. Open the helper's profile in  **Connect & Care**.
4. Tap the  settings icon and select **Confirm** and enable information sharing.
5. When done, tap .

**Note!** Even when the Doro 8030 user selects to share information with a helper, only the information available within the Connect & Care application is shared. Through the remote setup interface the current value for some settings can also be shared, but personal information on the Doro 8030, that is not stored inside the Connect & Care application, is still personal.

**Note!** To cancel a Care service subscription delete the profile that started the subscription. You can then add the profile again if you wish to continue using the free parts of Connect & Care or start a new subscription from another profile.

---

## My Doro Manager

**Note!** You need to have Internet access to use My Doro Manager. Depending on how you use your phone, it can use up a lot of Internet bandwidth really quickly. We strongly recommend that you contact your mobile operator about data roaming rates before you use data roaming.

**My Doro Manager** is an application that gives you or the **helper** the opportunity to manage Doro 8030 from the <http://www.mydoromanager.com> website. On the website you can also watch tutorials and discover a lot of possibilities in your Doro 8030.

**Note!** The Doro 8030 user needs to have both a Connect & Care profile and a Google™ —account to use My Doro Manager. To be able to use the My Doro Manager website any helpers also need a My Doro Manager account which they can set up by either linking their Facebook or a Google™ account. They can also create an My Doro Manager account that only requires an existing e-mail account to work. The Google account can also be used with other Google products like YouTube, Google+, Google Play, and Google Drive.

### How to Create a new account

#### In the Doro 8030

1. From the Home screen, tap  **My apps** →  **My Doro Manager**.
2. Follow the on-screen instructions to complete the account setup.

#### Access the web site

1. On the computer access <http://www.mydoromanager.com>.
2. Select either to manage your own phone or help someone else.
3. Sign in using your Google™ account.

**Note!** To help the Doro 8030 user remotely from their phone the helpers can also install the  **Connect & Care** application from Play store or App store. See *Remote setup*, p.61.

**Note!** The My Doro Manager helper application that is available through Play Store or App store is for older phone models and is not compatible with Doro 8030.

## Google search

### IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

**Note!** The available options may vary depending on your device settings.

### To use the web browser

1. From the Home screen, tap the Google™ search field .

**Note!** The first time you are asked if you want to Sign in with your Google account.

2. Tap next to  to search the Internet, to search you type words, or you can paste text, copied by you.
3. When you start a search on Google, you can find information faster by looking at search predictions. Search predictions are possible search terms you can use that are related to the terms you're typing and what other people are searching for.
4. Tap to select the best matching search results.  
To go back, tap **Back** .

## Internet (Web browser)

### IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

### To use the web browser

1. From the Home screen, tap  **View** →  **Something on the Internet.**
2. Tap **Voice input** or **Classic keyboard** to select how to enter your text. To search you type words, or you can paste text, copied by you.
3. When you have entered your search word, tap **Search**.

- 
4. To go back, tap **Back** .

**Note!** The first time you are asked if you want to Sign in with your Google account.

## Dock mode

You may think of the dock mode as a screensaver that turns your Doro 8030 into a side-table clock, a photo frame, a music player and more.

### Turn Dock mode on and off

1. Dock mode is launched automatically when the device is placed in the charging cradle.

To launch it manually select  **My apps** → **Dock mode**.

2. Remove the device from the cradle to exit.

To exit while the device is in the cradle press the **Home key** .

### Dock mode menu

1. From **Dock mode**, tap the screen to reach:
  - **Call** to make calls.
  - **Slideshow** to use the device as a photo frame.
  - **Do not disturb** to activate press once and simply press it again to deactivate.

**Note!** Do not disturb is a helpful setting for when you do not want to be disturbed, such as when you are sleeping or in a meeting. All notifications, alerts and calls are stopped from making any noise, vibration or lighting up the phone screen. You can schedule quiet hours to be repeated at the same time every day. Select to enable or disable the sound of the alarm clock during **Do not disturb**.

- **Music** to select music to be played (mirrors <sup>1</sup> from the Music app, see *Music*, p.66).

- 
1. Parts of what you see in the Dock mode derive/originate from other apps (in this case as replicas of Music Player and Alarm clock). To make changes and delete content you must go to the source app (Music Player and Alarm clock).
-

**Note!** If you like to fall asleep to music you can set the **Sleep timer** when playing music. Tap the  to select how many minutes you want the music to play.

- **Alarm** to set alarms and to handle already set alarm (mirrors <sup>2</sup> from the Alarm app, see *Alarm*, p.67).
- **Settings** to select the display background, the clock style and more.

2. To return to the previous screen, use **Back** .

## Magnifier

Use the screen to magnify text or other things you have trouble reading or seeing, the flash LED illuminates the object.

1. Tap  **My apps** →  **Magnifier**.
2. Use the display as a magnifier.
  - **|| Freeze object** to temporarily freeze the view in the display.
  -  **Un-freeze object** to release.
3. For more options, press **I want to**.
4. To exit press .

## Music

Use the music player to listen to music or other audio files.

### Play music

1. From the Home screen, tap  **Listen** →  **To my music**.
2. Tap to select a track from the list. The next track is automatically played.
3. Tap **||** to pause the track.
4. Press  to return to the Home screen. The music continues to play.
5. For more options, tap **I want to**.

---

2. Parts of what you see in the Dock fashion derive/originate from other apps (in this case as replicas of Music Player and Alarm clock). To make changes and delete content you must go to the source app (Music Player and Alarm clock).

---

**Tip:** While you're listening to music you can start and pause the music from the quick settings in the Notification panel. To open the Notification panel, swipe the status bar downwards.

## Listen to the radio

The FM radio has a frequency range from 87.5 to 108.0 MHz.

**Tip:** For best sound quality, set the phone in sleep mode by briefly pressing the  **Power button**.

### Turn on the radio

1. Connect a headset to the headset socket.
2. From the Home screen, tap  **Listen** →  **To the radio**. The radio is turned on. The tuned frequency is displayed.
3. Select  or  to scan channels.  
Press  to play and  to stop.  
Slide the scale to set the frequency manually.  
Use the side keys **+** and **-** to adjust the volume.
4. For more options, tap **I want to**.
5. Press  to return to the Home screen. The radio continues to play.  
Disconnect the headset to turn off the radio.

 to turn off the radio.

**Tip:** While you're listening to the radio you can start and pause from the quick settings in the Notification panel. To open the Notification panel, swipe the status bar downwards.

## Alarm

### Set alarms

The phone must be powered on in order for the alarm to function properly.

1. From the Home screen, tap  **Add** →  **An alarm** →  **Add alarm** and follow the on-screen instructions.

**Tip:** To save battery and prevent incoming calls or messages, you can turn on **Aeroplane mode** but still keep the alarm function, see *Aeroplane mode*, p.34.

---

## To edit or delete alarms

1. From the Home screen, tap  **View** →  **My alarms**.
2. To turn on and off switch .
3. Tap an alarm to edit it.
4. To delete an alarm tap **I want to** and select **Delete**.
5. Tap  to confirm.

## Stop or snooze an alarm

- Tap **Snooze** to snooze the alarm for 5 minutes.
- Tap **Stop** to stop the alarm.

## Calendar

### Add an event

1. From the Home screen, tap  **Add** →  **An event**.
2. Enter required information and set reminder notification.
3. Tap  to confirm.

### To edit or delete events

1. From the Home screen, tap  **View** →  **My calendar**.
2. Tap  or  to scroll month or day.
3. Dates that already has saved events or tasks in it are marked with a green dot. Tap the date and the tap an event to edit it.
4. For more options tap **I want to**.
  - To delete an event tap **Delete**
  - To select view mode tap **Display**.
5. Tap  to confirm.

## My notes

### Add a note

1. From the Home screen, tap  **View** →  **My tools** →  **My notes** →  **Add note**.
  2. Enter required information.
  3. For more options, tap **I want to**:
    - **Send this note** to share.
-

- **Delete this note** to delete.
4. Tap  **Save** to confirm.

## Timer

### Set timer

1. From the Home screen, tap  **My apps** →  **Timer**.
2. Tap **Set** and use the keypad digits to set the duration.
3. When done, tap **Start**.
4. Tap **Stop** when the alarm goes off.

**Tip:** You can use the phone as usual when the timer application is running as long as the phone is turned on.

## The calculator

Perform simple calculations.

1. From the Home screen, tap  **My apps** →  **The calculator**.
2. Enter the first number, select an operation (+, -, x, ÷) and enter next number. Repeat if needed.
3. Select = to calculate the result.

## Listen to a recorded sound

Use the sound recorder to record memos and messages.

### Record a sound

1. From the Home screen, tap  **Listen** →  **To a recorded sound**. The radio is turned on. The tuned frequency is displayed.
2. Select the  button to start recording.
3. Select the  button to pause recording.
4. Select the  button to stop recording.

### Listen to recording

After you have recorded your first memo you can select:

1. Tap **Recordings list**.
2. Tap a recording to listen to it.

3. Tap **I want to** and select:

- **Record a sound.**
- **Rename a sound.**
- **Send sound(s).**
- **Delete sound(s).** Select  for the items to delete, or **Select all.**

## Code safe

A convenient password manager for you to help keep track of and to remember your passwords and other personal information and sensitive data. The only code you need to remember from now on is the simple password you create for your personal password vault **Code safe.**

### Activate the code safe

1. From the Home screen, tap  **My apps** →  **Code safe.**
2. Enter a 3 number code to get started. When done, tap .
3. Enter the same 3 digit code and turn the handle downwards.
4. Tap **Add.**
5. Enter your note and tap  when done.
  - To edit a note, select the note, tap on the white writing area to get the keyboard. Edit the note and tap  when done.

### To delete safe note or change password

1. Tap **I want to** to select:
  - **Change my password** to change the password
  - **Delete note(s).** Select  for the items to delete, or **Select all.**

**Note!** All safe notes will be deleted if the wrong 3 number code is entered three (3) times. Write all the safe notes you keep in the Code safe on a piece of paper before resetting the phone or erasing the storage card.

---

## Google Apps

### IMPORTANT!

You need an Internet connection to use this service. It is recommended to use Wi-Fi connections when available to reduce costs for data traffic. Contact your service provider for detailed subscription costs before activating.

All pre-installed Google™ applications can be found in **Google Apps**. Depending on the market, the pre-installed applications can vary. To view more app information, access each app's help menu.

**Note!** Some apps may not be available or may be labelled differently depending on the region or service provider.

- From the Home screen select **Google** to open the Google™ applications.
  - **Chrome** search for information and browse webpages.
  - **Gmail** send or receive emails via the Google Mail service.
  - **Maps** find your location on the map, search for locations, and view location information for various places.
  - **Photos** search for, manage, and edit all your photos and videos from various sources in one place.
  - **Play Music** discover, listen to, and share music on your phone. You can upload music collections stored on your device to the cloud and access them later.
  - **Google** quickly search for items on the Internet or on your phone.
  - **Play Movies & TV** download videos to watch from Play Store, see *Google™ Play Store*, p.42.
  - **Drive** store your content on the cloud, access it from anywhere, and share it with others.
  - **YouTube** watch or create videos and share them with others
  - **Hangouts** chat individually or in groups with your friends.

## The cloud

The cloud is not a physical thing. The cloud is a network of servers, and each server has a different function. Some servers use computing power to run applications or "deliver a service." For example, when you take a

---

picture on your smartphone, it is stored on your phone's internal memory drive. However, when you upload the photos to Instagram, you are uploading it to the cloud.

So remember: The Cloud is a network of servers. Some servers provide an online service, and others allow you to store and access data, like Instagram or Dropbox. Chances are, you encounter the cloud daily. From Google Drive to Evernote, any time you store information without using up your phone's internal data, you're storing information in the cloud.

## Location based services

LBS stands for Location-Based Service and is a software application for mobile devices that requires knowledge about where the device is located. The service can be query-based and it can provide you with useful information such as “Where is the nearest restaurant?”. The service can also be push-based and send you coupons or let you view commute traffic. By law, location-based services must be permission-based. That means that you, must opt in (actively say yes) to the service in order to use it.

**Tip:**  is shown in the status bar when your phones location is being used by any app.

**Note!** Turning off location for your device also turns it off for Google apps and other non-Google apps. This means that apps can't use your phone's location, and many useful features will be turned off.

## How to disable GPS location services

1. From the Home screen, open the notification panel, tap  **Set** →  **My other connections** →  **The geolocation options.**
2. Switch  to disable location services.

## Status icons

	Signal strength		2.5G GPRS data
	No signal		EDGE data
	Roaming (in other network)		3G data
	Vibrate mode		HSPA data

	Silent mode		4G data
	Sleep mode		Data transmission: data in ▼, data out ▲.
	Google Play Store software updates available		Wi-Fi AP connected
	Google Play Store, update completed		Bluetooth on
	Unread email		Connected to computer
	New text message or multimedia message		Alarm active
	Flight mode activated		Charger connected
	Error occurred or caution required		Battery level
	GPS activated		Headset connected (without microphone)
	Missed call		Headset connected (with microphone)
	Call ongoing		SIM card not inserted
	Call forwarding on		Memory full

### Examples of soft keys

	Validate		Add picture
	Discard		Add current location
	Attachments		Add template text
	Call contact		Add video
	Write text or picture message (SMS/MMS)		Add voice recording
	Write email		Bring up the keypad

## Safety instructions

### CAUTION

The unit and the accessories can contain small parts. Keep all of the equipment out of the reach of small children.

The mains adapter is the disconnect device between the product and mains power.

The mains socket outlet must be close to the equipment and easily accessible.

## Network services and costs

Your device is approved for use on the 4G LTE FDD 3 (1800), 7 (2600), 20 (800) MHz / WCDMA 1 (2100), 2 (1900), 5 (850), 8 (900) MHz / GSM 850, 900, 1800, 1900 MHz networks. To use the device, you need a subscription with a service provider.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them.

## Operating environment

Follow the rules and laws that apply wherever you are, and always turn off the unit whenever its use is prohibited or can cause interference or hazards. Only use the unit in its normal user position.

Parts of the unit are magnetic. The unit can attract metal objects. Do not keep credit cards or other magnetic media near the unit. There is a risk that information stored on them can be erased.

## Wi-Fi (WLAN)

This equipment may be operated in all European countries.

The 5150 - 5350 MHz band is restricted to indoor use only.

AT	BE	BG	CH	CY	CZ	DE	DK	EE	ES	FI	FR
GR	HR	HU	IE	IS	IT	LI	LT	LU	LV	ME	MK
MT	NL	NO	PL	PT	RO	RS	SE	SI	SK	TR	UK

## Medical units

The use of equipment that transmits radio signals, for example, mobile phones, can interfere with insufficiently protected medical equipment. Consult a doctor or the manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions. If notices have been put up at health care facilities instructing you to turn off the unit while you are there, you should comply. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

---

## Implanted medical devices

To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 15 cm between a wireless device and the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15 cm from the medical device.
- Should not carry the phone in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.

If you have any reason to suspect that interference is taking place, turn the phone off immediately. If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

## Areas with explosion risk

Always turn off the unit when you are in an area where there is a risk of explosion. Follow all signs and instructions. There is a risk of explosion in places that include areas where you are normally requested to turn off your car engine. In these areas, sparks can cause explosion or fire which can lead to personal injury or even death.

Turn off the unit at filling stations, and any other place that has fuel pumps and auto repair facilities.

Follow the restrictions that apply to the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress.

Areas with risk for explosion are often – but not always – clearly marked. This also applies to below decks on ships; the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder.

## Li-Ion battery

This product contains a Li-Ion battery. There is a risk of fire and burns if the battery pack is handled improperly.

### WARNING

Danger of explosion if battery is incorrectly replaced. To reduce risk of fire or burns, do not disassemble, crush, puncture, short external contacts, expose to temperature above 60° C (140° F), or dispose of in fire or water. Recycle or dispose of used batteries according to the local regulations or reference guide supplied with your product.

## Protect your hearing

This device has been tested to comply with the Sound Pressure Level requirement laid down in the applicable EN 50332-1 and/or EN 50332-2 standards.

**WARNING**

Excessive exposure to loud sounds can cause hearing damage. Exposure to loud sounds while driving may distract your attention and cause an accident. Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

## Emergency calls

**IMPORTANT!**

Mobile phones use radio signals, the mobile phone network, the terrestrial network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, never rely only on a mobile phone for very important calls such as medical emergencies.

## GPS/Location based functions

Some products provide GPS/Location based functions. Location determining functionality is provided “As is”. No representation or warranty are made as to the accuracy of such location information. Use of location-based information by the device may not be uninterrupted or error free and may additionally be dependent on network service availability. Please note that functionality may be reduced or prevented in certain environments such as building interiors or areas adjacent to buildings.

**CAUTION**

Do not use GPS functionality in a manner which causes distraction from driving.

## Vehicles

Radio signals can affect electronic systems in motor vehicles (for example, electronic fuel injection, ABS brakes, automatic cruise control, air bag systems) that have been incorrectly installed or are inadequately protected. Contact the manufacturer or its representative for more information about your vehicle or any additional equipment.

Do not keep or transport flammable liquids, gases or explosives together with the unit or its accessories. For vehicles equipped with air bags: Remember that air bags fill with air with considerable force.

Do not place objects, including fixed or portable radio equipment in the area above the airbag or the area where it might expand. Serious injuries may be caused if the mobile phone equipment is incorrectly installed and the airbag fills with air.

It is prohibited to use the unit in flight. Turn off the unit before you board a plane. Using wireless telecom units inside a plane can pose risks to air safety and interfere with telecommunications. It may also be illegal.

## Protect your personal data

Protect your personal data and prevent leakage or misuse of sensitive information

- 
- While using your device, be sure to back up important data.
  - When disposing of your device, back up all data and then reset your device to prevent misuse of your personal information.
  - Carefully read the permissions screen when downloading applications. Be particularly cautious with applications that have access to many functions or to a significant amount of your personal information.
  - Check your accounts regularly for unapproved or suspicious use. If you find any sign of misuse of your personal information, contact your service provider to delete or change your account information.
  - In the event your device is lost or stolen, change the passwords on your accounts to protect your personal information.
  - Avoid using applications from unknown sources and lock your device with a pattern, password, or PIN.

## Malware and viruses

To protect your device from malware and viruses, follow these usage tips. Failure to do so may result in damages or loss of data that may not be covered by the warranty service.

- Do not download unknown applications.
- Do not visit untrusted websites.
- Delete suspicious messages or email from unknown senders.
- Set a password and change it regularly.
- Deactivate wireless features, such as Bluetooth, when not in use.
- If the device behaves abnormally, run an antivirus program to check for infection.
- Run an antivirus program on your device before you launch newly-downloaded applications and files.
- Do not edit registry settings or modify the device's operating system.

## Care and maintenance

Your unit is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

- Protect the unit from moisture. Rain, snow, humidity, and all types of liquids can contain substances that corrode the electronic circuits. If the unit gets wet, you should immediately power off the phone, remove the battery and allow the unit to dry completely before you replace it.
- Do not use or keep the unit in dusty, dirty environments. The unit's moving parts and electronic components can be damaged.
- Do not keep the unit in warm places. High temperatures can reduce the lifespan for electronic equipment, damage batteries and distort or melt certain plastics.
- Do not keep the unit in cold places. When the unit warms up to normal temperature, condensation can form on the inside and can damage the electronic circuits.
- Do not try to open the unit in any other way than that which is indicated here.

- Do not drop or shake the unit. If it is treated roughly the circuits and precision mechanics can be broken.
- Do not use strong chemicals to clean the unit.
- Do not disassemble, open, crush, bend, deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per IEEE-Std-1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Improper battery use may result in a fire, explosion or other hazard.

For devices that utilize a USB port as a charging source, the device's user manual shall include a statement that the device shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

The advice applies to the unit, battery, power adapter and other accessories. If the phone is not working as it should, please contact the place of purchase for service. Don't forget the receipt or a copy of the invoice.

## Warranty

This product is guaranteed for a period of 24 months and for original accessories for a period of 12 months (such as the battery, charger, charging cradle or handsfree kit) which may be delivered with your device, from the date of purchase. In the unlikely event of a fault occurring during this period, please contact the place of purchase. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal usage, non-maintenance or any other circumstances on the user's part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm.

Please note that this is a voluntary manufacturer's warranty and provides rights in addition to, and does not affect statutory rights of end-users.

This guarantee does not apply if batteries other than DORO original batteries are used.

## Specifications

Network bands (MHz) [maximum radio-frequency power/dBm]:

2G GSM	850 [33], 900 [33], 1800 [30], 1900 [30]
3G UMTS	1 (2100) [24], 2 (1900) [24], 5 (850) [24], 8 (900) [24]
4G LTE FDD	3 (1800) [24], 7 (2600) [22.5], 20 (800) [24]
Wi-Fi [maximum radio-frequency power/ dBm]:	WLAN IEEE 802.11 b/g/n (2412 - 2472) [19]
Bluetooth [maximum radio-frequency power/ dBm]:	4.1 (2402 - 2480) [10]
GPS receiver:	Category 3
Operating system:	Android 5.1.1
SIM card size:	Micro-SIM (3FF)
Dimensions:	138 mm x 71 mm x 11 mm
Weight:	144 g (including battery)
Battery:	3.7 V / 2000 mAh Li-ion battery
Image format:	BMP, GIF, JPG, PNG
Video format:	AVI, MP4, 3GP, 3GP2
Audio format:	WAV, AMR, MIDI, MP3, AAC
Main camera resolution:	5 MP
Front camera resolution:	VGA
Camera digital zoom:	4x
Display Size:	4.5"
Display resolution:	480 x 854
Internal memory:	8 GB
External memory:	<b>microSD, microSDHC</b> max 32 GB

To be valid, such a request must be made within three (3) years from the date of the distribution of this product by Doro AB, or in the case of code licensed under the GPL v3 for as long as Doro AB offers spare parts or customer support for this product model.

## Hearing aid compatibility

**Note!** For hearing aid compatibility, turn off Bluetooth connectivity.

This phone is hearing aid compatible. Hearing aid compatibility is not a guarantee that a specific hearing aid will work with a specific phone. Mobile phones contain radio transmitters that may interfere with hearing aid performance. This phone has been tested for use with hearing aids, for some of the wireless technologies that it uses, but there may be some newer wireless technologies that have not been tested yet for use with hearing aids. To ensure that a specific hearing aid works well with this phone, test them together before making a purchase.

The standard for hearing aid compatibility contains two types of ratings:

- **M:** To use your hearing aid in this mode, make sure that your hearing aid is set to "M-mode" or acoustic coupling mode, and position the phone's receiver near the hearing aid's built-in microphone. For the best results, try using the phone in different positions relative to your hearing aid—for example, placing the receiver slightly above the ear may result in better performance for hearing aids with microphones positioned behind the ear.
- **T:** To use your hearing aid in this mode, make sure that your hearing aid is set to "T-mode" or telecoil coupling mode (not all hearing aids have this mode). For the best results, try using the phone in different positions relative to your hearing aid—for

---

example, placing the receiver slightly below or in front of the ear may result in better performance.

Your device meets the M3/T3 level rating.

## Specific Absorption Rate (SAR)

This device meets applicable international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines from the independent scientific organization ICNIRP (International Commission of Non-Ionizing Radiation Protection).

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg averaged over 10 grams of tissue and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this device model are:

**Head SAR:** 0.737 W/kg

**Body SAR:** 1.660 W/kg

During normal use, the SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the output power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

This device meets RF exposure guidelines when used against the head or when positioned at least 0.5 cm away from the body. When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above stated separation distance from the body.

The World Health Organization (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, they recommend you reduce your usage or use a hands-free accessory to keep the device away from your head and body.

## Correct disposal of this product

(Waste Electrical & Electronic Equipment)

(Applicable in countries with separate collection systems)

This marking on the product, accessories or manual indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material

resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal. This product is RoHS compliant.

## Correct disposal of batteries in this product

(Applicable in countries with separate collection systems)

The marking on the battery, manual or packaging indicates that the battery in this product should not be disposed of with other household waste. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

## Declaration of Conformity

Hereby, Doro declares that the radio equipment type DSB-0010 (Doro 8030) is in compliance with Directives: 2014/53/EU and 2011/65/EU. The full text of the EU declaration of conformity is available at the following internet address: [www.doro.com/dofc](http://www.doro.com/dofc).
